

KIMAS'03 Forewords

KIMAS'03 Conference Organization

KIMAS'03 Invited Talks

|   |        |
|---|--------|
| Knowledge Understanding and Behavior  | p. 2   |
| Intelligent Nodes for Course of Actions Analysis  | p. 9   |
| Can Your Autonomous Robot Come Out And Play?  | p. 14  |
| Agent-based Dynamic Information Security Model  | p. 19  |
| Enhanced Frame-Based Knowledge Representation for an Intelligent Environment                          | p. 25  |
| A Multiple Objectives Optimization Approach to Robotic Teams' Analysis, Design and Control            | p. 31  |
| A Multi-Agent System for Natural Language Understanding   | p. 36  |
| Design and Implementation of An Agent-Oriented Expert System of Loan Risk Evaluation                  | p. 41  |
|   |        |
| An Organization-Based Adaptive Information System for Battlefield Situational Analysis                | p. 46  |
| Avoiding Collision Logjams through Cooperation and Conflict Propagation                               | p. 52  |
| Modeling of Knowledge Intensive Computerized Systems Based on Capability-Oriented Agent Theory (COAT) | p. 58  |
| Automata Theory for Multi-Agent Systems Implementation  | p. 65  |
| Multiple Knowledge Intelligent System   | p. 71  |
| SUO Communicator: Agent-based Support for Small Unit Operations                                       | p. 77  |
| A proposal on a model of an autonomous agent using the meta-level architecture                        | p. 83  |
| Multi Agents in Mid Involvement deception Systems   | p. 88  |
| Coping with Deception   | p. 94  |
| MKIDS - Management of Knowledge Intensive Dynamic Systems   | p. 100 |
| Coordinating Activity in Knowledge-Intensive Dynamic Systems  | p. 105 |
| Market-Based Task Allocation for Dynamic Information Processing Environments                          | p. 109 |
| The Virtual Design Team (VDT): A Multi-Agent Analysis Framework for Designing Project Organizations   | p. 115 |
| Destabilizing Dynamic Networks Under Conditions of Uncertainty  | p. 121 |
| Identifying Sets of Key Players in a Network  | p. 127 |
| Catalytic Reaction Sets, Decay, and the Preservation of Information                                   | p. 133 |
| A Hierarchical Genetic Algorithm with search space partitioning scheme                                | p. 139 |
| Evolution of Complex Autonomous Robot Behaviors using Competitive Fitness                             | p. 145 |
| Cellular Inference Network (CIN) for Learning and Control of Multi-Agents Cooperation                 | p. 151 |
| Towards Computational Sapience (Wisdom): A Paradigm for Sapient (Wise) Systems                        | p. 158 |
| Sapient Agents - Seven Approaches   | p. 166 |
| A Characterization of Sapient Agents  | p. 172 |
| Sapient Structures for Sapient Control  | p. 178 |
| Integrating Organizational Knowledge for Dynamic Scalable Multiagent Systems                          | p. 184 |
| Airborne Learning Algorithms. A Case Of a Ground Target Multiple Hypothesis Tracker                   | p. 190 |
|   |        |
| Advanced Core Design Using Multi-Agents Algorithm   | p. 196 |

|  |        |
|--|--------|
| Integraton of Development methodologies for the Building of Knowledge Intensive Multiagent Systems | p. 203 |
| Multi-Tier Communication Abstractions for Distributed Multi-Agents Systems                         | p. 209 |
| CONSMAG: Knowledge Representation Based Upon Consensus for Multiple Agents                         | p. 215 |
| Cooperative Multiple Robots Prevent Energy Repletion Problem                                       | p. 224 |
| An Infrastructure for Adaptive Control of Multi-Agent Systems                                      | p. 230 |
| Integrating knowledge centered MAS through organizational links                                    | p. 237 |
| A Data Mining Based Algorithm for Traffic Network Flow Forecasting                                 | p. 243 |
| Agent-Based Systems - Key Enabler for the Army Future Force  | p. 249 |
| Joint Synthetic Battlespace (JSB) Technology and Infrastructure Consideration                      | p. 256 |
| Adaptive Radar Signal Processing- The Problem of Exponential Computational Cost                    | p. 264 |
| Artificial Intelligence and Waveform Diversity   | p. 270 |
| Multi-agent Moving Target Search in a Hazy Environment   | p. 275 |
| Integration of Language and Cognition at Pre-Conceptual Level                                      | p. 280 |
| A Fuzzy Model of Natural Language Acquisition and Syntax Recognition by Humans                     | p. 287 |
| Vision Systems are Using the Wrong Kind of Information!  | p. 294 |
| Dynamic composition of process Federations for context aware perception of human activity          | p. 300 |
| Contextual Vocabulary Acquisition: From Algorithm to Curriculum                                    | p. 306 |
| A Family of Agent Based Models   | p. 312 |
| A Toolkit for the search of the Most General Interpretable Hypotheses                              | p. 318 |
| Intelligent Sensor Resource Management Using Evolutionary Computing Techniques                     | p. 325 |
| An Introduction to Perceptual Organization   | p. 330 |
| A k-Partition, Graph Theoretic Approach to Perceptual Organization                                 | p. 336 |
| Unified Bayes Multitarget Fusion of Ambiguous Data Sources   | p. 343 |
| Multisensory-Multitarget Sensor Management Using Geometric Objective Functions                     | p. 349 |
| Multisensor Image Fusion & Mining: From Neural Systems to COTS Software                            | p. 355 |
| Biologically-Inspired Algorithms for Object Recognition  | p. 364 |
| Model Design and Data Analysis for Multi-Input Multi-Output Systems                                | p. 368 |
| Application of Independent Component Analysis to Microarray Data                                   | p. 375 |
| A Biologically Inspired Concept for Active Image Recognition                                       | p. 379 |
| Object Patten Recognition Below Clutter in Images  | p. 385 |
| Paradigms Behind a Discussion on Artificial Intelligent/Smart Systems                              | p. 392 |
| Toward Wisdom in Procedural Reasoning: DBI, not BDI  | p. 395 |
| Meaning Generation and Artificial Wisdom   | p. 401 |
| Higher Spiritual Abilities (Prolegomena to a Physical Theory)                                      | p. 406 |
| From intelligent robot to multi-agent robotic system   | p. 413 |
| Multiresolutional Semiotics: Toward Understanding of Multiscale Intelligence                       | p. 418 |
| Problems of Performance Measurement in Locally Organized Systems                                   | p. 432 |
| Using Data-Mining to Allow Robots to Discover the Preferences of Humans                            | p. 438 |
| Agent-Assisted document composition in specific domains  | p. 444 |
| Towards an Epistemic Analysis of Causality in Distributed Systems                                  | p. 450 |

|   |        |
|---|--------|
| Coordinated Multi-Procedural Architecture for Probabilistic Knowledge Discovery   | p. 457 |
| Elements of Theory of Interpretation  | p. 463 |
| Agent-Based Interpretation of Geospatial Evidential Data  | p. 477 |
| Multi-Resolutional Knowledge Representation Using Prototypes and Properties   | p. 483 |
| Combinatorial PCA and SVM Methods for feature selection in Learning Classification (Applications to text Categorization)        | p. 491 |
| Emulating the Honeybee Information Sharing Model  | p. 497 |
| Image Compression in Real-Time Multiprocessor Systems Using Divisive K-Means Clustering   | p. 506 |
| NDAS: The Nondeterministic Agent System for Engineering Drawing Analysis  | p. 512 |
| A Non-Hierarchical Method for Distributed Hypothesis Management   | p. 517 |
| Using Dynamic Classification to Expand Individual/Intuitive Search processes  | p. 523 |
| Organizing and Accessing a Comprehensive Knowledge Base Using the World Wide Web  | p. 529 |
| Rapid Knowledge Base Design via Extension of Mid-level Knowledge Components   | p. 535 |
| Architecture for Information Assurance Decision Support Systems based on Integration of Knowledge Intensive Multi-Agent Systems | p. 542 |
| Threat Response Management System (TRMS)  | p. 547 |
| CADRE: Continuous Analysis and Discovery from Relational Evidence   | p. 555 |
| Semantic Knowledge Source Integration, a Progress Report  | p. 562 |
| The Technology and Practice of Integrated Multi-Agent Event Correlation Systems   | p. 568 |
| In Search for Hidden Meaning: Pospelov's Work on Applied Semiotics  | p. 575 |
| Finding Unique Records in Unknown Data  | p. 580 |
| Capabilities Aware Routing for Dynamic Ad-hoc Networks  | p. 585 |
| Artificial Intelligence and Sensor Fusion   | p. 591 |
| Task management in Sensor-provided Operator Platforms   | p. 596 |
| STEM: a Methodology for the Development of Multiagent Design Tools Using a General Knowledge Model of Configurational Design    | p. 602 |
| The Assessment of Knowledge in Theory and in Practice   | p. 609 |
| Sharing Learning Policies between Multiple Mobile Robots  | p. 616 |
| Integration of Perception and Learning in the CAEDUS Cognitive Architecture   | p. 622 |
| Design and Implement of the Home Networking Service Agent Federation Using Open Service Gateway                                 | p. 628 |
| Service Demand Analysis Using Multi-Attribute Learning Mechanisms   | p. 634 |
| Clusters with Core-tail Hierarchical structure and their Application to machine Learning Classification                         | p. 640 |
| Using a Semiotics-Inspired Tool for the Control of Intelligent Opponents in Computer Games                                      | p. 647 |
| Dynamics in Semiotics   | p. 653 |
| Advanced Models for Backscattering from Rough Surfaces  | p. 659 |
| Decision-Making Processes in Organizations: A Logical-Semiotic Perspective  | p. 664 |
| An Architecture for Combining Ways to Think   | p. 669 |
| Stochastic Search, Optimization, and the Simultaneous Perturbation Algorithm - A Tutorial                                       | p. 676 |
| An Integrating Semantics of Hybrid Dynamic Systems  | p. 679 |

|  |        |
|--|--------|
| Dynamic Integration of Distributed Semantic Services   | p. 684 |
| Finding The Place Your Data Fits With Respect to 'Ideal Knowledge': A Fuzzy Process Model              | p. 690 |
| On a Computational Model of the Peircean Semiosis  | p. 703 |
| Software Tool for Agent-Based Distributed Data Mining  | p. 710 |
| Cooperative Multi-Agent Mobile Sensor Platforms for Jet Engine Inspection - Concept and Implementation | p. 716 |
| Fast, Feature-Based Wavelet Shrinkage Algorithm for Image Denoising                                    | p. 722 |
| User-Centric Service Brokerage in a Personal Multi-Agent Environment                                   | p. 729 |
| Emergent Hierarchies for Knowledge Agents  | p. 736 |
| The Topologies of Cooperation in Knowledge Intensive Multi-Agent Systems                               | p. 741 |
| A Knowledge-based Model to Database Retrieval  | p. 747 |
| A Logic-based Framework for Mobile Multi-Agent Systems   | p. 754 |
| Knowledge Management for Engineers   | p. 760 |
| Autocreative Hierarchy II: Dynamics Self-organization, Emergence and Level-changing                    | p. 766 |
| Author Index   | p. 774 |
